Michael Jordan

- Made \$300,000 per game
- \$10,000 per minute (avg. 30 minutes per game)
- Going to a movie cost him \$8.00-but he made \$18,550 while he was there

AMAZING!

- Made \$7,414 an hour more than minimum wage

- To save up for an Acura NSX costing \$90,000 would have taken him 12 hours
- In one year he made twice as much as ALL U.S. presidents for all their terms combined
- If you were given a penny for every \$10 he made, you would make \$65,000 per year.

However...

If Jordan saved 100% of his income for 250 years, he'd still have less than Bill Gates has today!!!

GAME OVER!

Who do you think reads more, Michael Jordan or Bill Gates?
